boian.ivanov44@gmail.com
London, UK

Senior Full Stack Engineer with experience in modern serverless architectures and traditional client-server workflow. Solid knowledge in front-end frameworks (**Svelte & SvelteKit**, **Vue 3 & Nuxt**), **Typescript & Node.js** user and advocate on everything JAM-stack. Excited around the future of web development.

Experience

Senior Full Stack Engineer

[iTech Media](#) · London, United Kingdom

Sep 2020 - Present

Development on a full reusable platform using SvelteKit with Typescript & Node.js, with Cloudflare workers hosted on AWS, while using Contentful as the CMS and Tailwind CSS for the frontend. Our in-house developed platform would allow for development speed on websites, full re-theming between them and also give full power to our content team to deliver their ideas to our users within minutes. Prior to that, worked on migrating a legacy PHP (LAMP stack) software to a modern solution using Vue.js with Nuxt and a Serverless architecture with Node.js hosted on AWS.

Full Stack Developer

[Zavamed](#) · London, United Kingdom

May 2019 - Jul 2020

Use of modern tech stacks to build the tools that will help our health clinics and doctors be as productive as possible. Working in an Agile (SCRUM) environment we were able to achieve quick development and deployment of much needed features to be used by the wider business. Key technologies used: VueJS, AWS, Serverless, NodeJS, Jenkins, PHP, Kirby, PHPUnit, Buefy, Jest.

Senior Web Developer

[First Clarity](#) · London, United Kingdom

Nov 2017 - May 2019

Development and support of company clients' websites. Redesigning The Telegraph's Puzzles website from a Flash based to a fully mobile-friendly website. Supporting our in-house created engagement and monetization platform, Evolok (evolok.com). Daily utilizing PHP & ES6 alongside Bootstrap 4.

Lead Full Stack Developer

[SapirShop.com](#) · Sofia, Bulgaria

Mar 2017 - Nov 2017

Improve an outdated e-commerce platform into a leading brand that was available in four countries, adopting OpenCart as the platform of choice. Achieved this by developing modifications, modules and extensions as well as providing active support. Collaborating with successful local companies (Rapido, Econt, Emag, Profitshare, etc.) to integrate their services within our supply chain.

Computer Science Educator

[IT STEP Computer Academy](#) · Sofia, Bulgaria

Dec 2016 - Mar 2017

Composing and teaching courses in software education. Courses that were designed and taught by me where: "HTML & CSS Introduction" and "Introduction to CMS for Designers (WordPress & Joomla)"

Web Developer

[RS Consult BG](#) · Sofia, Bulgaria

Oct 2016 - Feb 2017

Working on multiple projects based on different PHP frameworks (Laravel & Opencart). Creation of a conference website using WordPress with custom user orientated plugin handling document uploading (Feza2017.org).

Web Development Intern

[ITR Services Ltd.](#) · Bulgaria

Jun 2016 - Aug 2016

Learning and working with CMS platforms based on PHP (Joomla & WordPress). Magento module development for an ecommerce platform.
